The Management Company believes that such treatment is more equitable than expensing the entire amount during the first year of operation, as is required by International Financial Reporting Standards. Accordingly, the Auditor's opinion of the Company's and the Sub-Fund's financial statements may contain a qualification to this treatment.

REPORTING AND NET ASSET VALUE CALCULATION

EXTERNAL MANAGER'S REPORTS:

The External Manager will prepare the half yearly and the annual report for submission to the Regulator and to avail to the Unit Holders at the points of distribution of the Units. The half yearly report will be prepared in accordance with the IFRS Standard No 34, within 2 months from the end of the six-month period and the annual report will be prepared, audited and submitted to CySEC within 6 months from the end of the fiscal year.

NAV CALCULATION:

The Management Company has delegated the calculation of the Net Asset Value per Unit to the Administrator. The Administrator will calculate the Net Asset Value per Unit at each Valuation Day.

The Net Asset Value shall be calculated with respect to any Valuation Day by ascertaining the value of the Total Assets and deducting from such amount the Total Liabilities of the Sub-Fund which shall include all fees and expenses payable and/or accrued and/or estimated to be payable out of the assets of the Sub-Fund. The Net Asset Value of each Unit Holder shall be determined by multiplying the Net Asset Value of the Fund with the percentage owned by each Unit Holder and rounding the resulting total to two decimal places. The Net Asset Value will be calculated in EURO.

In the event that a Sub-Fund is divided into different classes of Investor Shares, the amount of the Net Asset Value of the Sub-Fund attributable to a class shall be determined by establishing the number of Investor Shares issued in the class at the relevant Dealing Day and by allocating the relevant fees and class expenses to the class, making appropriate adjustments to take account of distribution, subscriptions, redemptions, gains and expenses of that class and apportioning the Net Asset Value of the Sub-Fund accordingly.

In calculating the unit Net Asset Value, the Administrator shall rely on the estimation of the Fair Value of Investments, as estimated by the Valuer. Depending on the Auditor's opinion as to the appropriate valuation methodology under IFRS, the Fair Value of Investments recorded in the Fund's audited financial statements may differ from the estimates shown in the semiannual Financial Reports (see below).

In determining the Fair Value of an Investment the Valuer will use judgment and take into consideration those specific terms of the Investment that impact on its Fair Value. The Valuer will exercise judgment to select the valuation methodology that is most appropriate for a particular Investment. Methodologies will be applied consistently from period to period except where a change in methodology would result in better estimates of Fair Value.

Below is a short description of the methodologies used:

1. Based on Closing Market Prices:

For exchange traded instruments the most frequently used methodology is using the instruments' market price at the close of trading. Bloomberg mid-prices will be used for bonds.

For instruments that are thinly traded, the Valuer may deem necessary that an adjustment to the public market price is appropriate based on sound valuation analysis.

There are three main methods used to value a stock after factoring in a discount for block holdings. The first method involves an estimation of the value of the instrument obtainable through a private placement of the instrument through an intermediary, and the associated costs incurred. Secondly, the market approach involves a determination of the discount for lack of marketability of the shares based on studies on this subject.

2. Based on comparable transaction value:

For non-traded instruments one of the methodologies used will be that of comparable instrument transaction. In this case, the Valuer may look at transactions in instruments that have the same or very similar characteristics to those held by the fund.

3. Discounted Cash flow value of Bonds:

As with any security or capital investment, the theoretical fair value of a bond is the present value of the stream of cash flows it is expected to generate. Hence, the value of a bond is obtained by discounting the bond's expected cash flows to the present using an appropriate discount rate. In practice, this discount rate is often determined by reference to similar instruments, provided that such instruments exist. Various related yield-measures are then calculated for the given price.

If the bond includes embedded options, the valuation is more difficult and combines option pricing with discounting. Depending on the type of option, the option price as calculated is either added to or subtracted from the price of the "straight" portion. This total is then the value of the bond.

The Valuer may also use other methodologies that he/she deems more appropriate to accurately reflect the value of the instrument at the time of the valuation.

Suspension of Valuation

The Directors may at any time temporarily suspend the determination of the Net Asset Value and consequently the issue and redemption of Investor Shares in any Portfolio in the following instances:

- a. any period when any market or recognized exchange on which a substantial portion of the Investments of the Fund from time to time are quoted or dealt in is closed otherwise than for ordinary holidays, or during which dealings therein are restricted or suspended;
- b. the existence of any state of affairs which constitutes an emergency or otherwise as a result of which, disposal or valuation of Investments owned by the Company cannot, in the opinion of the Directors, be effected normally or without prejudicing the interest of Unit Holders;
- c. any breakdown in the means of communication normally employed in determining the price of any of the Fund's Investments or of current prices on any recognized exchange or during any period when for any other reason the prices of any Investments owned by the Fund cannot be reasonably promptly or accurately ascertained; or

- d. any period when the Fund is unable to repatriate funds for the purposes of making payments on the redemption of Investor Shares or during which the realization of Investments, or the transfer or payment of funds involved in connection therewith cannot, in the opinion of the Board of Directors be effected at normal prices or normal rates of exchange.
- e. during the whole or part of any period when circumstances outside the control of the Directors exist as a result of which any disposal or valuation of Investments of the relevant Fund is not reasonably practicable or would be detrimental to the interests of Unit Holders or it is not possible to transfer monies involved in the acquisition or disposition of Investments to or from the relevant account of the Fund;

and shall temporarily suspend the determination of the Net Asset Value of a Fund or attributable to a Class and the issue and redemption of Units in any Fund or Class if directed to do so by.

Notice of any such suspension and notice of the determination of any such suspension shall be published by the Fund in such manner as the Board of Directors of the External Manager may deem appropriate to the persons likely to be affected thereby and notified immediately to CySEC and in any event within the Business Day on which such suspension took effect.

In such case, the subscription monies or any outstanding balance will be returned without delay to the subscriber by post or bank transfer at the subscriber's risk without any interest.

Further Subscriptions of Investor Shares

Following the Initial Offering Period, if any, in respect of Investor Shares of a Sub-Fund or Class, applications may be made to purchase Investor Shares of the Sub-Fund or Class on each Dealing Day at the Subscription Price calculated with reference to the Net Asset Value per Share of the relevant Sub-Fund or Class, as the case may be, calculated for that Dealing Day, provided that the subscription monies have been paid in full to the Depositary and the relevant confirmation has been transmitted from the Depositary to the Management Company.

If funds are not settled by the Cut-off time of the Dealing Day where the application form has been submitted by the Investor, then the allocation of shares shall be made on the Dealing Day the Depositary provides its confirmation at the Subscription Price of that Dealing Day.

The Subscription Price per Investor Share of the relevant Sub-Fund or Class is calculated in accordance with the procedures referred Net Asset Value Calculation. The Subscription Price will be published as determined in the relevant Supplement.

Minimum Subscription and Minimum Additional Subscription

The Minimum Subscription and Minimum Additional Subscription amount for all Classes in each Sub-Fund are as set out in the relevant Supplement. The Directors may, in their discretion, or as otherwise may be delegated to the Management Company, waive or modify such minimum limits.

Subscriptions in Kind

The Management Company may issue Investor Shares as consideration for a contribution in kind of transferable securities or other financial instruments, corresponding to the investment policy of the relevant Sub-Fund, in compliance with the provisions set forth by the Alternative Investment Fund Law and the Articles of the Company. Any such Subscription in kind will be valued by the Management Company and the Valuer, if required. All supplemental costs associated with subscription in kind will be borne by the Investor making the contribution in kind or such other party as agreed by the External Manager.

Application Procedure

Investor Shares may be subscribed for directly through the Management Company. Subscription for Investor Shares may be made to the Management Company in writing by electronic mail or facsimile or by such other means as may be prescribed by the Directors (with original document to follow promptly by post along with any supporting documentation required to prevent money laundering) as indicated in the Application Form attached as Appendix B.

Subscription requests received by the Management Company prior to the Cut-Off Time on any Dealing Day shall be effected on the basis of the Net Asset Value per Share determined on that Dealing Day, provided that the payment has been made in full to the Depositary and a confirmation for settlement of the said funds has been transmitted by the Depositary to the Management Company. Any subscription request received by the Management Company after the Cut-Off Time on any Dealing Day, or on any day that is not a Dealing Day, will be processed on the next Dealing Day on the basis of the Net Asset Value per Share determined on that Dealing Day. Alternatively, if the confirmation by the Depositary is not received by the Management Company by the cut-off time on that Dealing Day, the subscription will be processed on the basis of the NAV per Share determined on the Dealing Day the confirmation of funds has been obtained by the Management Company.

A Subscription Fee may be payable as further detailed in Section "Fee and Charges" and the relevant Supplement.

Payment Procedure

Payment Instructions are described in Schedule A of the Prospectus and may also be obtained from the Management Company.

The normal currency of payment for Investor Shares will be the Reference Currency of the Sub-Fund or the Class concerned. A subscriber may, however, with the agreement of the Management Company, effect payment to the Depositary in any other freely convertible currency. The Management Company will arrange, on the Valuation Day concerned, for any necessary currency transaction to convert the subscription monies from the currency of subscription into the Reference Currency of the Sub-Fund or Class as applicable. Any such currency transaction will be effected at the subscriber's cost and risk. Currency exchange transactions may however delay any issue of Shares since the Management Company may choose in its discretion to delay the execution of any foreign exchange transaction until cleared funds have been received by it.

If in a jurisdiction in which Investor Shares are sold, any issue or sales taxes become payable to the relevant tax administration, the Initial Subscription Price or Subscription Price (as applicable) will increase by that amount.

Notification of Transaction

Provided the subscription proceeds in clear funds and all documentation required have been received, a confirmation statement will be sent by the Management Company to the Investor (or its nominated agent if so requested by the Shareholder) by ordinary post, electronic mail or facsimile as soon as reasonably practicable after the relevant Valuation Day, providing full details of the transaction. Shareholders should always check this statement to ensure that the transaction has been accurately recorded.

Investors will be given a personal account number (the "Personal Account Number") on acceptance of their initial subscription and will be provided with an annual statement of account by the Management Company. The Personal Account Number should be used by the Shareholder for all future dealings with the Company and the Management Company.

Any changes to the Investors personal details or loss of Account Number must be notified immediately either to the Management Company or the relevant Distributor, if appointed, who will, if necessary, inform the Management Company in writing. Failure to do so may result in the delay of any application for subscription or redemption. The Company reserves the right to require an indemnity or other verification of title or claim to title countersigned by a bank, stockbroker or other party acceptable to it before accepting such changes.

Rejection of Subscriptions

The Management Company may reject any Subscription in whole or in part, and it may, at any time and from time to time and in its absolute discretion without liability and without notice, discontinue the issue and sale of Investor Shares in any Class of Shares in any one or more Sub-Funds.

If any Subscription is not accepted in whole or in part, the subscription monies or the balance outstanding will be returned without delay to the subscriber by post or bank transfer at the subscriber's risk without any interest.

Subscription through Nominees

The Management Company draws the investors' attention to the fact that any investor will only be able to fully exercise his Shareholder rights directly against the Company, if the investor is registered himself and in his own name in the Shareholders' register of the Company. In cases where an investor invests in the Company through an intermediary investing into the Company in his own name but on behalf of the investor (a "Nominee"), it may not always be possible for the investor to exercise certain Shareholder rights directly against the Company. Investors are advised, apart from the content noted in the section Risk Disclosures, to take advice on their rights.

For the avoidance of doubt, in cases where a Nominee invests into the Company in his own name but on behalf of several investors, any applicable Minimum Subscription and/or holding amounts will be assessed at the level of the Nominee, without applying any look-through to the level of the individual, underlying investors.

REDEMPTION OF INVESTOR SHARES

Procedure for Redemption

Investor Shares may be redeemed either in whole or in part on any Dealing Day at a Redemption Price calculated on the basis of the Net Asset Value per Unit as determined on that Dealing Day.

On payment of the Redemption Price, the corresponding Investor Shares will be cancelled immediately in the Company's Register of Unit Holders. Any taxes, commissions and other fees incurred in the respective countries in which the Investor Shares are redeemed will be charged. The Sub-Funds shall at all times maintain sufficient liquidity to satisfy any redemption requests for Investor Shares, unless a lawful temporary suspension of redemption applies.

Application Procedure

Unit Holders wishing to have all or some of their Investor Shares redeemed by the Company may apply to do so by completing and sending the Redemption Form attached as Appendix C to this Prospectus to the Management Company by electronic mail or facsimile (with original document to follow promptly by post). The application for redemption of any Investor Shares must include either (i) the monetary amount the Investor wishes to redeem or (ii) the number of Investor Shares the Investor wishes to redeem. In addition, the application for redemption must include the Investor's personal details together with its Personal Account Number. Failure to provide any of the aforementioned information may result in delay of such application for redemption. No redemption payment may be made to an Investor until the Redemption Form has been received from the Investor and all documentation required by the Management Company, including the original Application Form and any documents in connection with anti-money laundering, and the anti-money laundering procedures have been completed.

Any application for redemption received by the Management Company prior to the Cut-Off Time on any Dealing Day shall be effected on the basis of the Net Asset Value per Unit determined on that Dealing Day. Any application for redemption received by the Management Company on any Dealing Day after the Cut-Off Time, or on any day that is not a Dealing Day, will be processed on the next following Dealing Day on the basis of the Net Asset Value per Unit as determined on such Dealing Day.

A Redemption Fee may be levied on the redemption proceeds as further detailed in Fees and Expenses and in the relevant Supplement.

Any application for redemption shall be irrevocable except in the case of a suspension as detailed in part Temporary Suspension of the Determination of the Net Asset Value, Issue, Redemption of Shares, and must be duly signed by all registered Unit Holders whose name appears on the Register of the Company, except for the case where an acceptable power of attorney has been provided to the Management Company.

Investors should note that if an application for redemption relates to a partial redemption of an existing holding of Investor Shares, and the remaining balance within the existing holding is below the Minimum Holding, such Investors may be required to amend or withdraw their redemption request such that they meet the Minimum Holding or the Management Company in its discretion may require the Investors to fully redeem their Investor Shares.

Notification of Transaction

A confirmation statement will be sent by the Management Company to the relevant Investor (or its nominated agent if so requested by the Investor) by ordinary post, electronic mail or facsimile as soon as reasonably practicable after the relevant Dealing Day, detailing the redemption proceeds due.

Investors should check this statement to ensure that the transaction has been accurately recorded in the Reference Currency of the Sub-Fund or Class concerned. In calculating the redemption proceeds,

the Management Company will round down the amount to the nearest cent (0.01), with the Company being entitled to receive the adjustment.

The Redemption Price per Unit in each Sub-Fund or Class may be higher or lower than the Subscription Price paid by the Investor, depending on the Net Asset Value per Unit of the relevant Sub-Fund or Class at the time of redemption. The Redemption Price will be published as detailed in the relevant Supplement.

Payment for Investor Shares redeemed will be paid in cash in the Reference Currency of the Sub-Fund or Class concerned not later than four (4) Business Days after the relevant Dealing Day, unless legal constraints, such as foreign exchange controls or restrictions on capital movements, or other circumstances beyond the reasonable control of the Depositary, make it impossible or impracticable to transfer the redemption amount to the country in which the application for redemption was submitted.

Limitation on Redemptions

The Management Company shall ensure that the Sub-Funds have at all times enough liquidity to satisfy any redemption request. If the redemption requests in aggregate exceed 10% of the Net Asset Value of the relevant Sub-Fund at any time, the Management Company may decide to defer, without any unnecessary delay, the execution of such applications until the corresponding amount of assets of the Sub-Fund have been realized.

Compulsory Redemption

The Directors in their sole and absolute discretion may, after giving notice of at least thirty (30) days, compulsorily redeem under certain circumstances, including but not limited to the following:

- (i) the Investor Shares are held by or for the benefit (directly or indirectly) of any Ineligible Person;
- (ii) a holder of Investor Shares has become an Ineligible Person;
- (iii) such Investor Shares have been acquired in breach of any laws of any country or the decision, order or determination of any governmental agency;
- (iv) such redemption would eliminate or reduce the exposure of the Company or its holders of Investor Shares to adverse tax or regulatory consequences;
- (v) any of the representations given by the holder of Investor Shares in its subscription agreement were not true or have ceased to be true;
- (vi) the latest value of Investor Shares held by an Investor is less than the Minimum Holding (if any); it is to be clarified that the said notice in such case shall allow the Investor to increase his holding above such Minimum Holding amount within a period to be specified therein;
- (vii) upon liquidation of all underlying assets of a Sub-Fund or a Class; or
- (viii) when the Company is being liquidated.

The External Manager may charge any legal, accounting or administrative costs associated with such compulsory redemption.

Distributions in respect of a compulsory redemption shall be made in the same manner and under the same terms as a regular redemption.

The Redemption Price for an Investor Share in such compulsory redemption shall be determined by reference to the prevailing Net Asset Value per Unit on the Dealing Day specified by the Directors in its

notice to the holder of Investor Shares. A holder of Investor Shares whose shares are compulsorily redeemed will have no investor's rights after the Cut-Off Time on the relevant Dealing Day.

Redemption Suspension

In exceptional cases when circumstances so require, and in all events when it is in the interests of Unit Holders to do so, the Management Company may issue a decision, having first obtained permission from the Cyprus Securities and Exchange Commission (CySEC) to suspend the redemption of units under the common terms and conditions set out in this section, for one or more Investment Compartments named in the relevant decision, for a period of up to 1 month which may, where there are grounds for doing so, be extended for another one month maximum, provided permission has again been obtained from the CySEC. By way of exception, the CySEC may issue a decision extending the suspension of redemption for a period of time longer than the 1 month specified above, to safeguard the interests of Unit Holders and the problem-free operation of the market, but the total duration of the suspension may not exceed 3 months.

The Management Company shall promptly submit the decision to suspend the redemption of units to the Cyprus Securities and Exchange Commission in order to obtain the permission referred to above and shall inform the competent supervisory authorities of the other Member States in which the units of the Compartment of the AIF are on sale, to which the suspension of redemption relates. The same notice shall also be sent in the case of a decision of the CySEC extending the duration of the suspension of redemption.

Where the conditions justifying the suspension of redemption of units cease to apply before the end of the suspension period elapses, the Management Company shall revoke the suspension and inform the CySEC and the competent supervisory authorities of the Member States where the units of the Compartment are sold of the aforesaid cease.

The suspension of the redemption, its extension, its expiry or revocation, as well as the reasons for the suspension and the point in time at which it ends, shall be published without delay by placing a notice to that effect to the Management Company's website.

While the suspension on the acquisition of units is in effect, it shall not be permitted to submit applications for redemption or for Unit Holders to redeem units. However, pending applications submitted before the Decision was taken by the Management Company to suspend redemption shall be satisfied.

In exceptional cases, the CySEC may, bearing in mind the need to protect the interests of Unit Holder, issue a decision suspending the redemption of units in a Compartment on its own initiative.

The provisions of this section above relating to the duration of the suspension, extensions to it, publication of notices about the start, end or revocation of the suspension, briefing the competent supervisory authorities and prohibitions on the submission of redemption applications, and the redemption of units in the Compartment shall apply mutatis mutandis to the case where the redemption of units is suspended following a decision of the CySEC.

TRANSFER OF INVESTOR SHARES

Unit Holders may subscribe for and redeem Unit interests and may transfer or assign their Units, or any part, but not without the prior consent of the External Manager. The External Manager may without limitation withhold such consent in the event that it determines, in its sole discretion, that the full transfer or partial assignment will result in any breach of applicable laws and/or regulations. The transferee will be obligated to pass the same Know Your Client process as any other Unit Holder before being accepted by the External Manager.

The instrument of transfer of any share shall be executed by or on behalf of the transferor and transferee, and the transferor shall be deemed to remain a holder of the Units until the name of the transferee is entered in the Register of Unit Holder in respect thereof.

Subject to such of the restrictions of these Regulations as may be applicable, any Unit Holders may transfer all or any of his Investor Shares by instrument in writing in any usual or common form or any other form which the Directors may approve.

The External Manager may decline to register the transfer of a Unit to a person of whom it shall not approve. The Management Company may also decline to recognize any instrument of transfer unless:

(a) the instrument of transfer is accompanied by the certificate of the Units to which it relates, and such other evidence as the External Manager and/or the Administrator may reasonably require to show the right of the transferor to make the transfer, and

(b) the instrument of transfer is in respect of only the class of Units.

If the External Manager refuses to register a transfer it shall, within two months after the date on which the transfer was lodged with the Fund, send to the transferee notice of the refusal.

The registration of transfers may be suspended at such times and for such periods as the Board of Directors of the External Manager may from time to time determine, provided always that such registration shall not be suspended for more than thirty days in the year.

The transferor shall be deemed to remain the holder of the Unit until the name of the transferee is entered in the Register in respect thereof.

The implications for the transferor and transferee of Units in respect of which a performance fee is payable pursuant to these presents shall be determined by the External Manager in its discretion from time to time and disclosed in the Prospectus.

The External Manager may at its discretion decline to register any transfer of a Unit if:

- (a) in consequence of such transfer the transferor or the transferee would hold a number of Units less than the Minimum Holding or the transferee would hold less than the Minimum Subscription;
- (b) all applicable taxes and/or stamp duties have not been paid in respect of the instrument of transfer;
- (c) the instrument of transfer is not deposited at the Office or such other place as the External Manager may reasonably require, accompanied by the Certificate for the Units to which it relates, such evidence as the External Manager and/or the Fund Administrator may reasonably require to show the right of the transferor to make the transfer, such relevant information and declarations as the External Manager may reasonably require from the transferee including, without limitation, information and declarations of the type which may be requested from an applicant for Units in the Fund and such fee as may from time to time be specified by the Directors for the registration of any instrument of transfer;

- (d) they are aware or reasonably believe the transfer would result in the beneficial ownership of such Investor Shares by a person in contravention of any restrictions on ownership imposed by the Directors or might result in legal, regulatory, pecuniary, taxation or material administrative disadvantage to the relevant Fund or Class or Unit Holders as a whole; or
- (e) the transferor has not supplied all of the relevant documentation in relation to anti-money laundering checks.

All instruments of transfer which shall be registered shall be retained by the Fund, but any instrument of transfer which the External Manager may decline to register shall (except in the case of fraud) be returned to the person depositing the same.

In the case of the death of a Unit Holder, the survivors or survivor where the deceased was a joint holder and the executors or administrators of the deceased where he was a sole or surviving holder, shall be the only person(s) recognized by the Fund as having title to his interest in the Units, but nothing in this Article shall release the estate of the deceased Unit Holder whether sole or joint from any liability in respect of any Unit solely or jointly held by him.

Any guardian of an infant Unit Holder and any guardian or other legal representative of a Unit Holder under legal disability and any person entitled to a Unit in consequence of the death, insolvency or bankruptcy of a Unit shall, upon producing such evidence of his title as the External Manager may require, have the right either to be registered himself as the holder of the Unit or to make such transfer thereof as the Unit Holder could have made, but the External Manager shall have the same right to refuse or suspend registration as they would have had in the case of a transfer of the Unit by the Unit Holder.

A person so becoming entitled to a Unit in consequence of the death, insolvency or bankruptcy of a Unit Holder shall have the right to receive and may give a discharge for all moneys payable or other advantages due on or in respect of the Unit, but shall not be entitled to receive notice of or to attend at meetings of the Fund, nor, save as aforesaid, to any of the rights or privileges of a Unit Holder unless and until he shall be registered as a Unit Holder in respect of the Units provided always that the External Manager may at any time give notice requiring any such person to elect either to be registered himself or to transfer the Units and if the notice is not complied with within ninety days the External Manager may thereafter withhold all moneys payable or other advantages due in respect of the Units until the requirements of the notice have been complied with.

If the Company is required to deduct, withhold or account for tax including any penalties and interest thereon upon the transfer of Units by a Unit Holder it shall do so as legally required under the relevant Laws, Regulations and Directives.

PROCEDURE FOR ORDERS REPRESENTING 10% OR MORE OF THE NET ASSETS OF ANY SUB-FUND

If any application for redemption is received in respect of any one Dealing Day, which either singly or when aggregated with other such applications so received, represents more than 10% of the net assets of any Sub-Fund, the Management Company reserves the right, in its sole and absolute discretion and without liability and in the reasonable opinion of the Management Company that to do so is in the best interests of the remaining Investors, to scale down pro rata each application with respect to such Dealing Day so that not more than 10% of the Net Asset Value of the relevant Sub-Fund be redeemed or converted on such Dealing Day.

To the extent that any application for redemption is not given full effect on such Dealing Day by virtue of the exercise by the Management Company of its power to pro-rate applications, such application shall be treated with respect to the unsatisfied balance thereof as if a further request had been made by the Investors in question in respect of the next Dealing Day and, if necessary, subsequent Dealing Days, until such application shall have been satisfied in full.

With respect to any applications for redemption received in respect of such Dealing Day, to the extent that subsequent applications shall be received in respect of a following Dealing Day, such later applications shall be postponed in priority to the satisfaction of applications relating to such first Dealing Day, but subject thereto shall be dealt with as set out above.

PROHIBITION OF LATE TRADING AND MARKET TIMING

Late Trading

Late Trading is to be understood as the reception of a subscription or redemption order after the relevant Cut-Off Times on the relevant Dealing Day and the execution of such order at the price based on the Net Asset Value applicable to such same day. Late Trading is strictly forbidden. In order to avoid such practices, Investor Shares are issued at an unknown price, and the Management Company will not accept orders received after the relevant Cut-Off Times. The Management Company determines the price of its Investor Shares on a forward basis. This means that it is not possible to know in advance the Net Asset Value per share at which Investor Shares will be bought or sold exclusive of any subscription or redemption fee as defined hereafter. Subscription and redemption applications have to be received and will be accepted for each Sub-Fund only in accordance with the Sub-Fund's subscription deadline.

Market timing

Market Timing is to be understood as an arbitrage method through which an investor subscribes or redeems or converts Investor Shares of the Company within a short time period, by taking advantage of time differences and/or imperfections or deficiencies in the method of determination of the Net Asset Value of the relevant Sub-Fund. Market Timing practices may disrupt the investment management of the portfolios and harm the performance of the relevant Sub-Fund. The Company is not designed for investors with short-term investment horizons. Activities such as market timing which may adversely affect the interests of the Investors, for example disrupt investment strategies or impact expenses, or the use of the Company as an excessive or short term trading vehicle are not permitted.

While recognizing that Investors may have legitimate needs to adjust their investments from time to time, the Management Company in its discretion may, if it deems such activities adversely affect the interests of the Company or the Company's Shareholders, take action as appropriate to deter such activities.

Accordingly if the Management Company determines or suspects that an Investor has engaged in Market Timing activities, it may suspend, cancel, reject or otherwise deal with that Investor's subscription applications and take any action or measures as appropriate or necessary to protect the Company and its Investors.

Conflicts of Interests

The Directors, the External Manager of the Fund, the Depositary of the Fund and the Administrator may from time to time act as External Manager of the Fund, Depositary of the Fund, Registrar, Broker, Administrator, or Dealer in relation to, or be otherwise involved in, other funds established by parties other than the Fund which have similar objectives to those of the Fund. It is, therefore, possible that any of them may, in the course of business, have potential conflicts of interest with the Fund. Each will, at all times, have regard in such event to its obligations to the Company and will endeavor to ensure that such conflicts are resolved fairly.

In addition, any of the foregoing may deal, as principal or agent, with the Fund, provided that such dealings are carried out as if effected on normal commercial terms negotiated on an arm's length basis. The External Manager of the Fund, or any of its affiliates or any person connected with it, may invest in, directly or indirectly, or manage or advise other investment funds or accounts, which invest in assets which may also be purchased or sold by the Fund. Neither the External Manager of the Fund, nor any of its affiliates, nor any person connected with it, is under any obligation to offer investment opportunities of which any of them becomes aware to the Fund or to account to the Fund in respect of (or share with the Fund or inform the Fund of) any such transaction or any benefit received by any of them from any such transaction, but will allocate such opportunities on an equitable basis between the Fund and other clients. In determining the Net Asset Value, the Directors may rely on valuations provided or attributed to any asset or liability by the External Manager of the Fund. As the External Manager of the Fund and the Performance Fee are determined by reference to the Net Asset Value, the External Manager of the Fund may have a conflict of interest in providing valuations. To mitigate such risk, the External Manager will rely on the valuation from an independent regulated entity.

Such conflicts of interest may not be a complete list of all the potential conflicts of interest associated with an Investment in the Fund, or the underlying investments of the Fund. Therefore, prospective investors should read this Offering Memorandum in its entirety.

Should a conflict of interest arise, the Board will endeavour to ensure that it is resolved timely and fairly.

By acquiring an interest in the Fund, each Unit Holder will be deemed to have acknowledged the existence of such potential conflicts of interests and to have waived any claim with respect to any liability arising from the existence of any such conflict should this conflict be disclosed to the investors prior to the investment being concluded.

RISK DISCLOSURE

The nature of Investment is such that the Fund may not be a suitable investment for investors other than those who are knowledgeable in investment matters, are able to bear the economic risk of the investment, understand the risk involved, believe that the investment is suitable for their particular investment objective and financial needs and have no need for liquidity of investment.

Before making an investment decision with respect to Units of any Class in any Sub-Fund, prospective Investors should carefully consider all of the information set out in this Prospectus and the any Supplement relating to the relevant Sub-Fund, as well as their own personal circumstances.

The risk factors referred to therein, and in this document, alone or collectively, may reduce the return on the Units of any Sub-Fund and could result in the loss of all or a proportion of an Investor's investment in the Units of any Sub-Fund. The price of the Units of any Sub-Fund can go down as well as up and their value is not guaranteed. Investors may not receive, at redemption or liquidation, the amount that they originally invested in any Class of Shares or any amount at all.

The risks may include or relate to equity markets, bond markets, foreign exchange rates, interest rates, credit risk, counterparty risk, market volatility and political risks. The risk factors set out in this Prospectus and the relevant Supplement are not exhaustive. There may be other risks that a prospective Investor should consider that are relevant to its own particular circumstances or generally.

An investment in the Units of any Sub-Fund is only suitable for investors who (either alone or in conjunction with an appropriate financial or other adviser) are capable of evaluating the merits and risks of such an investment and who have sufficient resources to be able to bear any losses that may result therefrom.

Before making any investment decision with respect to the Units, any prospective investors should consult their own stockbroker, bank manager, lawyer, solicitor, accountant and/or financial adviser and carefully review and consider such an investment decision in the light of the foregoing and the prospective investor's personal circumstances.

Historical Performance

The past performance of the Sub-Funds or any other investment vehicle managed by the Management Company and the Portfolio Manager or any of their affiliates is not meant to be an indication of their potential future performance. The nature of and risks associated with the Sub-Funds may differ substantially from those investments and strategies undertaken historically by the Management Company and Portfolio Manager, their affiliates or the Sub-Funds themselves. In addition, market conditions and investment opportunities may not be the same for the Sub-Funds as they had been in the past, and may be less favourable. Therefore, there can be no assurance that the Sub-Funds' assets will perform as well as the past investments managed by the Management Company, the Portfolio Manager or their affiliates. It is possible that significant disruptions in, or historically unprecedented effects on, the financial markets and/or the businesses in which the Sub-Funds invest could diminish any relevance the historical performance data of the Sub-Funds may have to the future performance of those Sub-Funds.

Business Risk

There can be no assurance that the Sub-Funds will achieve their investment objectives in respect of any of the strategies employed. The investment results of the Sub-Funds managed by the Management Company and the Portfolio Managers respectively are reliant upon the success of the strategies implemented by the Management Company and the Portfolio Managers in the Sub-Funds managed by them respectively.

Declining Performance and Growing Size Risk

Trading large positions may adversely affect prices and performance. In addition, there can be no assurance that appropriate investment opportunities will be available to accommodate future increases in assets under management which may require the Management Company and the Portfolio Managers to modify their investment decisions for the Sub-Funds because they cannot deploy all the assets in the manner they desire. There can be no assurance whatsoever as to the effect of an increase in assets under management may have on the Sub-Fund's future performance.

Effect of Substantial Redemptions and Reduced Size Risk

Substantial redemptions by Shareholders within a short period of time could require a Sub-Fund to liquidate securities positions more rapidly than would otherwise be desirable, possibly reducing the value of the Sub-Fund's assets and/or disrupting the Management Company's or Portfolio Managers' investment strategy, depending on who is managing the portfolio of such Sub-Fund. Reduction in the size of a Sub-Fund could make it more difficult to generate a positive return or to recoup losses due to, among other things, reductions in the Sub-Fund's ability to take advantage of particular investment opportunities or decrease in its ratio of income to expenses.

Model Risk

Certain strategies require the use of quantitative valuation models as developed by third parties. As market dynamics shift over time (for example, due to changing market conditions and participants), a previously highly successful model often becomes outdated or inaccurate. As a result, the Management Company or Portfolio Manager, depending on who is managing the portfolio of the Sub-Fund concerned, may not recognize this and substantial losses may be incurred. There can be no assurance that the Management Company or any Portfolio Manager will be successful in continuing to develop and maintaining effective quantitative models.

Trading Execution Risk

Many of the trading techniques used by the Sub-Funds require rapid and efficient execution of transactions. Inefficient executions can eliminate the small pricing differentials that the Management Company or the Portfolio Managers may seek to exploit, and thus may materially impact the profitability of a Sub-Fund's positions.

Risk of Proprietary Trading and Other Activities of the Management Company, the Investment Managers and their Affiliates

The Management Company, the Portfolio Managers and their principals, directors, officers, partners, members, managers, shareholders, employees and affiliates trade or may trade for their own accounts, and certain of such persons have sponsored or may in the future sponsor or establish other public and private investment funds.

The Management Company, the Portfolio Managers and their affiliates may trade for accounts other than the Sub-Funds' accounts and will remain free to trade for such other accounts. In this regard, they will also remain free to utilize trading strategies and formulae in trading for such accounts which are the same as or different from the ones that the Management Company and the Investment Managers will utilize in making trading decisions on behalf of the Sub-Funds managed by the Management Company or the Portfolio Managers respectively.

In addition, and if and when applicable, the Management Company, the Investment Managers or their affiliates may in their respective proprietary trading take positions the same as or different than those taken on behalf of the Sub-Funds in accordance with the internal policies of the Management Company, the Investment Manager and their affiliates. The records of any such trading will not be available for inspection by Shareholders except to the extent required by law. Because of price volatility, occasional variations in liquidity, and differences in order execution, it might not be possible for the Management Company, the Portfolio Manager and their affiliates to obtain identical trade execution for all their respective clients. When block orders are filled at different prices, the Management Company, the Portfolio Manager and their affiliates will assign the executed trades on a systematic basis among all client accounts.

Brokers and Dealers Fee Risk

The policy of both the Management Company and the Portfolio Manager regarding purchases and sales for their portfolios is that primary consideration will be given to obtaining the most favorable execution of the transactions in seeking to implement the investment strategy of the Sub-Funds managed by the Management Company or the Portfolio Manager, as applicable. The Management Company and the Portfolio Manager will effect transactions with those brokers, dealers, futures commission merchants, banks and other counterparties (collectively, "brokers and dealers") which the Management Company and the Portfolio Manager believe provide the most favorable net prices and who are capable of providing efficient executions, among other considerations.

Order Allocation Risk

When the Management Company, the Portfolio Manager and their affiliates deem the purchase or sale of securities to be in the best interest of the Sub-Fund and of other clients of theirs as applicable, they may aggregate the securities to be purchased or sold in order to obtain superior execution and/or lower

brokerage expenses. In such event, allocation of the securities purchased or sold, as well as expenses incurred in the transaction, shall be made in a manner in which the Management Company, the Portfolio Manager and their affiliates consider in their sole and absolute discretion to be the most fair. When there is limited supply of an investment opportunity, the Management Company, the Portfolio Manager and their affiliates shall allocate investment opportunities among the Sub-Fund and other accounts in a manner which they determine in their sole and absolute discretion to be fair and reasonable.

MARKET RELATED RISKS

Interest Rate Risk

Interest rates are determined by factors of supply and demand in the international money markets which are influenced by macro-economic factors, speculation and central bank and government intervention. Fluctuations in short term and/or long term interest rates may affect the value of the both equities and bonds. Fluctuations in interest rates of the currency in which the bonds or equities are denominated and/or fluctuations in interest rates of the currency or currencies in which the Sub-Fund's Assets are denominated may affect the value of the Shares.

Reinvestment Risk

This is the risk of having to reinvest proceeds at a lower rate than the funds were previously earning. One of the main ways this risk presents itself is when interest rates fall over time, and the issuers of callable bonds exercise them. That would increase the Fund's cash balances and reduce its portfolio holdings. In the absence of alternative investment options, the Fund may be unable to maintain its investment returns. The Fund will endeavour to reduce its exposure to this risk by investing in bonds of varying maturities and if callable of different potential exercise periods.

Credit or Default Risk

An investment in bonds or other debt securities involves counterparty risk of the issuer of such bonds or debt securities which may be evidenced by the issuer's credit rating. An investment in bonds or other debt securities issued by issuers with a lower credit rating are generally considered to have a higher credit risk and a greater possibility of default than that of more highly rated issuers. In the event that any issuer of bonds or other debt securities experiences financial or economic difficulties this may affect the value of the bonds or other debt securities (which may be zero) and any amounts paid on such bonds or other debt securities (which may be zero). This may in turn affect the Net Asset Value per Share of the investing Sub-Funds.

Underlying Funds

A Funds of Funds investment renders the investing Sub-Fund dependent on the investment results and liquidity conditions of the underlying investment funds. Existing or prospective Investors should be aware that the investing Sub-Fund is subject to the liquidity management measures applied and the investment results, positive or negative, achieved by the underlying investment funds.

Volatility Trading and Stagnant Markets

Market volatility is a derivative of directional market movements and is itself often materially more volatile than underlying reference asset prices. Price movements are influenced by many unpredictable factors, such as market sentiment, inflation rates, interest rate movements and general economic and political conditions.

At any given time, different market participants will have different views on the level of market volatility; if the Management Company or the Portfolio Manager incorrectly estimates market volatility, then it will misprice the options which it trades.

Volatility strategies depend on mispricing and changes in volatility. In periods of trendless, stagnant markets and/or deflation, alternative investment strategies have materially diminished prospects for profitability.

Relative Value Strategies

The success of relative value trading is dependent on the ability to exploit relative mis-pricings among interrelated instruments. Although relative value positions are considered to have a lower risk profile than directional trades – as the former attempt to exploit price differentials not overall price movements – relative value strategies are by no means without risk. Mis-pricings, even if correctly identified, may not converge within the time frame in which a Sub-Fund maintains its positions. Even pure “riskless” arbitrage — which is rare — can result in significant losses if the arbitrage cannot be sustained (for example due to margin calls) until expiration. A Sub-Fund’s relative value strategies are subject to the risks of disruptions in historical price relationships, the restricted availability of credit and the obsolescence or inaccuracy of its own or third-party valuation models. Market disruptions may also force a Sub-Fund to close out one or more positions. Such disruptions have in the past resulted in substantial losses for relative value strategies.

Directional Trading

Certain positions taken by a Sub-Fund may be designed to profit from forecasting absolute price movements in a particular instrument. Predicting future prices is inherently uncertain and the losses incurred, if the market moves against a position, will often not be hedged. The speculative aspect of attempting to predict absolute price movements is generally perceived to exceed that involved in attempting to predict relative price fluctuations.

Liquidity Risk

In some circumstances, investments may become relatively illiquid making it difficult to dispose of them at the prices quoted on the various exchanges. Accordingly, a Sub-Fund’s ability to respond to market movements may be impaired and the Sub-Fund may experience adverse price movements upon liquidation of its investments. Settlement of transactions may be subject to delay and administrative uncertainties.

Inflation Risk

When buying a bond, an investor is essentially committed to a certain fixed or variable rate for the period he or she holds the bond. Unless, the bond interest is inflation adjusted, the investor will be exposed to eroding purchase power and potentially inflationary adjusted negative rates of return.

Market Volatility

Market volatility reflects the degree of instability and expected instability of the performance of the Sub-Fund’s assets. The level of market volatility is not purely a measurement of the actual volatility, but is largely determined by the prices of instruments which offer protection against such market volatility. The prices of these instruments are generally determined by forces of supply and demand in the options and derivatives markets. These forces are themselves, affected by factors such as actual market volatility, expected volatility, macro-economic factors and speculation.

Event Risk

The risk that a bond’s issuer undertakes a leveraged buyout, debt restructuring, merger or recapitalization that increases its debt load, causing its bonds’ values to fall, or interferes with its ability to make timely payments of interest and principal. Event risk can also occur due to natural or industrial accidents or regulatory change.

Active Trading Risk

The Fund engages in frequent trading of portfolio securities. Active trading results in added expenses and may result in a lower return and increased tax liability.

Changing Fixed Income Market Conditions Risk

The current historically low interest rate environment was created in part by the Federal Reserve Board (FRB) and certain foreign central banks keeping the federal funds and equivalent foreign rates at or

near zero. There is a risk that interest rates will rise when the FRB and central banks raise these rates. This risk is heightened due to the potential “tapering” of the FRB’s quantitative easing program and other similar foreign central bank actions. This tapering and eventual increase in the federal funds and equivalent foreign rates may expose fixed income markets to heightened volatility and reduced liquidity for certain fixed income investments, particularly those with longer maturities. In addition, decreases in fixed income dealer market-making capacity may also potentially lead to heightened volatility and reduced liquidity in the fixed income markets. As a result, the value of the Fund’s investments and share price may decline. Changes in central bank policies could also result in higher than normal shareholder redemptions, which could potentially increase portfolio turnover and the Fund’s transaction costs.

Currency/Exchange Rate Risk

The euro value of the Fund’s foreign investments will be affected by changes in the exchange rates between the euro and the currencies in which those investments are traded.

Emerging Markets Securities Risk

The prices of securities issued by foreign companies and governments located in emerging market countries may be affected more negatively by inflation, devaluation of their currencies, higher transaction costs, delays in settlement, adverse political developments, the introduction of capital controls, withholding taxes, nationalization of private assets, expropriation, social unrest, war or lack of timely information than those in developed countries.

Floating Rate Risk

The Fund may invest in floating rate loans and debt securities that require collateral. There is a risk that the value of the collateral may not be sufficient to cover the amount owed, collateral securing a loan may be found invalid, and collateral may be used to pay other outstanding obligations of the borrower under applicable law or may be difficult to sell. There is also the risk that the collateral may be difficult to liquidate, or that a majority of the collateral may be illiquid.

Foreign Government Debt Risk

Investments in foreign government debt obligations involve certain risks in addition to those relating to foreign securities or debt securities generally. The issuer of the debt or the governmental authorities that control the repayment of the debt may be unable or unwilling to repay principal or interest when due in accordance with the terms of such debt, and the Fund may have limited recourse in the event of a default against the defaulting government. Without the approval of debt holders, some governmental debtors have in the past been able to reschedule or restructure their debt payments or declare moratoria on payments.

Foreign Securities Risk

The Fund’s foreign investments may be affected by changes in a foreign country’s exchange rates, political and social instability, changes in economic or taxation policies, difficulties when enforcing obligations, decreased liquidity, and increased volatility. Foreign companies may be subject to less regulation resulting in less publicly available information about the companies.

High Yield Bond (Junk Bond) Risk

Junk bonds involve a greater risk of default or price changes due to changes in the credit quality of the issuer. The values of junk bonds fluctuate more than those of high-quality bonds in response to company, political, regulatory or economic developments. Values of junk bonds can decline significantly over short periods of time.

Management Risk

The investment techniques and risk analysis used by the Fund’s portfolio managers may not produce the desired results. Because the Fund’s investment process relies heavily on its asset allocation process,

market movements that are counter to the portfolio managers' expectations may have a significant adverse effect on the Fund's net asset value.

When-Issued and Delayed Delivery Risks

When-issued and delayed delivery transactions are subject to market risk as the value or yield of a security at delivery may be more or less than the purchase price or the yield generally available on securities when delivery occurs. In addition, the Fund is subject to counterparty risk because it relies on the buyer or seller, as the case may be, to consummate the transaction, and failure by the other party to complete the transaction may result in the Fund missing the opportunity of obtaining a price or yield considered to be advantageous.

Zero Coupon or Pay-In-Kind Securities Risk

The value, interest rates, and liquidity of non-cash paying instruments, such as zero coupon and pay-in-kind securities, are subject to greater fluctuation than other types of securities. The higher yields and interest rates on pay-in-kind securities reflect the payment deferral and increased credit risk associated with such instruments and that such investments may represent a higher credit risk than coupon loans. Pay-in-kind securities may have a potential variability in valuations because their continuing accruals require continuing judgments about the collectability of the deferred payments and the value of any associated collateral.

ANTI-MONEY LAUNDERING

Measures aimed towards prevention of money laundering require each applicant for Units to verify his identity up to the ultimate Beneficial Owner to the External Manager. This obligation is strictly required and the External Manager will notify Applicants of its KYC due diligence client acceptance requirements. The said measures are required by the Prevention and Suppression of Money Laundering and Terrorist Financing Laws of 2007-2013, and the Commission's Directive (DI144-2007-08) of the same subject matter.

As a general guideline the following documents are required to be produced:

Each applicant for Units acknowledges that the External Manager shall be held harmless against any loss arising as a result of a failure to process his application for Units or redemption request if such information and documentation as has been requested by the External Manager has not been provided by the applicant. As part of its responsibility for the prevention of money laundering, the Company (or any person acting on its behalf, including the External Manager) will require verification of the identity and address of any applicant for Units and of the source of payment.

Depending on the circumstances of each applicant, a detailed verification may not be required where:

- (A) the applicant makes payment from an account held in the applicant's name at a recognised financial institution; or

If a subscription is not accepted, any funds received by or on behalf of the Company in connection with that subscription will be returned without interest to the account from which such funds were originally debited. The Company, or any person acting on its behalf, also reserves the right to refuse to make any redemption payment or other distribution to a Unit Holder if any of the Directors of the Company, or any person acting on its behalf, suspects or is advised that the payment of any redemption moneys or other distribution to such Unit Holder might result in a breach or violation of any applicable anti money laundering or other laws or regulations by any person in any relevant jurisdiction, or such refusal is considered necessary or appropriate to ensure compliance by the Company, its Directors or any person acting on its behalf with any such laws or regulations in any relevant jurisdiction.

If any person resident in the Republic of Cyprus, including the Company's attorneys, or the Company, and, if applicable, any of its Directors or any person acting on its behalf, knows or suspects that a payment to the Company (by way of subscription or otherwise) is the proceeds of criminal conduct, such person is required to report such information under the laws of the Republic of Cyprus.

SUITABILITY REQUIREMENTS

General

Admission as a Unit Holder in the Fund is not open to the general public. The Fund is not intended as a complete investment program and is designed only for persons who are able to bear the economic risk of the investment and are either "Professional" or "Well-informed" investors within the meaning of the Law.

Professional Investors

A Professional Investor for the purposes of the Law is any investor that is considered, or may be treated on request, as an investor falling under the definition of a 'professional client' as defined in MiFID. A professional client is a client who possesses the experience, knowledge and expertise to make its own investment decisions and properly assess the risks that it incurs. In order to be considered a professional client, the client must comply with the criteria prescribed in Annex II of the Investment Services and Activities and Regulated Markets Law as amended.

Well-informed Investors

Well-informed Investor is an investor not considered to be a Professional Investor who meets the following criteria:

- a) an investor confirming in writing that:
 - o he has sufficient knowledge and experience in financial and business matters to evaluate the merits and risks associated with the prospective investment and that he is aware of the risks associated with the prospective investment; or
 - o his business activity is related to the management, acquisition or sale of assets, either on the investor's own account or on behalf of third parties, and are of the same type as the investments of the AIF; and
- b) (i) invests at least €125.000 in the AIF; or
(iii) has been assessed by a credit institution, an AIFM, a UCITS Management Company, an IF or an external manager of AIFs authorised in the Republic or another Member State for the management of AIFs whose assets do not exceed the limits provided for in article 4(2) of the Alternative Investment Fund Managers Law or the corresponding article 3(2) of Directive 2011/61/EU, and the above assessment shows that he has the necessary knowledge and experience in financial and business matters, to evaluate the merits and risks associated with the AIF's prospective investment based on the AIF's investment policy; or
(iv) is employed by one of the persons referred to in subparagraph (ii) of paragraph (b), receiving total remuneration that takes him into the same remuneration bracket as the natural persons who effectively conduct the business of the person referred to in subparagraph (ii) of paragraph (b) or the executive members of their governing body, who effectively conduct their business
- c) by way of derogation from paragraphs (a) and (b), the investor is a person who effectively directs the business of the AIF or its external manager or is a person engaged in the AIF's investment management functions.

Prospective investors should satisfy themselves that an investment in the Fund is suitable for them, should examine this Offering Memorandum, the Fund's Memorandum and Articles of Association, the Investment Management Agreement and Administration Agreement, and should avail themselves of access to such additional information about the offering, the Fund, the Directors and their businesses as they consider necessary to make an informed investment decision.

Each Unit Holder must bear the economic risk of its investment for an indefinite period of time because the Units have not been registered under any securities act/law of any country and, therefore, cannot be sold unless they are subsequently registered or an exemption from such registration is available. It is not contemplated that any such registration will ever be effected, or that certain exemptions provided by rules promulgated under securities act/law of any country will be available.

Each Unit Holder will be required to represent that the Units are being acquired for its own account, for investment purposes, and not with a view to resale or distribution. Participation in the Fund is suitable as an investment only for professional and well informed investors for whom an investment in the Fund does not constitute a complete investment program and who fully understand, are willing to assume, and who have the financial resources necessary to withstand, the risks involved.

In addition to the net worth and income standards described herein, each investor must have funds adequate to meet personal needs and contingencies, must have no need for prompt liquidity from their investment, and must participate in the Fund for investment purposes only, and not with a view to their sale or distribution.

Each investor must also, either alone or together with a purchaser representative, have sufficient knowledge and experience in financial and business matters generally, and in securities investment in

particular, to be capable of evaluating the merits and risks of investing in the Fund. Because of the inability to withdraw capital from the Fund and the risks of investment (some of which are discussed in the "Risk Disclosures" document), a purchase of Units would not be suitable for an investor who does not meet the suitability standards discussed in this Offering Memorandum.

Notwithstanding the suitability requirements referred to herein, the Directors reserve the right to reject any prospective investor for any reason in its sole and absolute discretion.

Each offeree hereunder should obtain advice from its own legal, accounting, tax, and other advisors in reviewing this Offering Memorandum and before deciding to invest in the Fund.

Reliance on Subscriber Information

Representations and requests for information regarding the satisfaction of investor suitability standards are included in the Application Package that each prospective investor must complete. Provided, however, that the Directors are entitled to rely on the truthfulness and accuracy of any representation made by a prospective investor in the Fund, each of whom is presumed to have access superior to that available to the Directors with respect to any relevant information therein requested. In the event that the Directors deem it necessary to obtain additional evidence to substantiate information or representations contained in any Application Package, prospective investor will also be required to provide the same. The standards set forth above are only minimum standards. The Fund may reject a subscription for any reason or no reason, regardless of whether a prospective investor meets the suitability standards. In addition, the Fund may waive minimum suitability standards not imposed by law.

The Fund anticipates imposing comparable suitability standards in connection with any resale of Units that the Fund approves in its sole and absolute discretion.

Units may not be offered, issued, acquired or transferred to any person in circumstances which, in the opinion of the Directors, might result in the Fund incurring any liability to taxation or suffering any other pecuniary disadvantage which the Fund might not otherwise incur or suffer, or would result in the Fund being required to register under any applicable security laws in any jurisdiction.

It is the responsibility of each prospective investor to ensure that the subscription for Units does not violate any applicable laws in the investor's jurisdiction of residence.

Any proposed transferee of Units will be required to provide such representations, warranties and documentation as may be required by the External Manager or the Directors or their agents to ensure that the above requirements are met prior to the issue of and registration or any transfer of Units.

- a) less than 50% of the NFE's gross income for the preceding calendar year or other appropriate reporting period is passive income and less than 50% of the assets held by the NFE during the preceding calendar year or other appropriate reporting period are assets that produce or are held for the production of passive income;
- b) the stock of the NFE is regularly traded on an established securities market or the NFE is a Related Entity of an Entity the stock of which is regularly traded on an established securities market;
- c) the NFE is a Governmental Entity, an International Organisation, a Central Bank, or an Entity wholly owned by one or more of the foregoing;
- d) substantially all of the activities of the NFE consist of holding (in whole or in part) the outstanding stock of, or providing financing and services to, one or more subsidiaries that engage in trades or businesses other than the business of a Financial Institution, except that an Entity does not qualify for this status if the Entity functions (or holds itself out) as an investment fund, such as a private equity fund, venture capital fund, leveraged buyout fund, or any investment vehicle whose purpose is to acquire or fund companies and then hold interests in those companies as capital assets for investment purposes;
- e) the NFE is not yet operating a business and has no prior operating history, but is investing capital into assets with the intent to operate a business other than that of a Financial Institution, provided that the NFE does not qualify for this exception after the date that is 24 months after the date of the initial organisation of the NFE;
- f) the NFE was not a Financial Institution in the past five years, and is in the process of liquidating its assets or is reorganising with the intent to continue or recommence operations in a business other than that of a Financial Institution;
- g) the NFE primarily engages in financing and hedging transactions with, or for, Related Entities that are not Financial Institutions, and does not provide financing or hedging services to any Entity that is not a Related Entity, provided that the group of any such Related Entities is primarily engaged in a business other than that of a Financial Institution; or
- h) the NFE meets all of the following requirements:
 - i) it is established and operated in its jurisdiction of residence exclusively for religious, charitable, scientific, artistic, cultural, athletic, or educational purposes; or it is established and operated in its jurisdiction of residence and it is a professional organisation, business league, chamber of commerce, labour organisation, agricultural or horticultural organisation, civic league or an organisation operated exclusively for the promotion of social welfare;
 - ii) it is exempt from income tax in its jurisdiction of residence;
 - iii) it has no shareholders or members who have a proprietary or beneficial interest in its income or assets;
 - iv) the applicable laws of the NFE's jurisdiction of residence or the NFE's formation documents do not permit any income or assets of the NFE to be distributed to, or applied for the benefit of, a private person or non-charitable Entity other than pursuant to the conduct of the NFE's charitable activities, or as payment of reasonable compensation for services rendered, or as payment representing the fair market value of property which the NFE has purchased; and
 - v) the applicable laws of the NFE's jurisdiction of residence or the NFE's formation documents require that, upon the NFE's liquidation or dissolution, all of its assets be distributed to a Governmental Entity or other non-profit organisation, or escheat to the government of the NFE's jurisdiction of residence or any political subdivision thereof.

Dual resident Entities may rely on the tiebreaker rules contained in tax conventions (if applicable) to determine their residence for tax purposes.

Reportable Person is defined as a "Reportable Jurisdiction Person", other than:

- a corporation the stock of which is regularly traded on one or more established securities markets;
- any corporation that is a Related Entity of a corporation described in clause (i);
- a Governmental Entity;

- a Financial Institution (except for an Investment Entity described in Sub Paragraph A(6) b) of the CRS that are not Participating Jurisdiction Financial Institutions. Instead, such Investment Entities are treated as Passive NFE's.)

Resident for tax purposes Each jurisdiction has its own rules for defining tax residence, and jurisdictions have provided information on how to determine whether an entity is tax resident in the jurisdiction on the OECD automatic exchange of information portal. Generally, an Entity will be resident for tax purposes in a jurisdiction if, under the laws of that jurisdiction (including tax conventions), it pays or should be paying tax therein by reason of his domicile, residence, place of management or incorporation, or any other criterion of a similar nature, and not only from sources in that jurisdiction. Dual resident Entities may rely on the tiebreaker rules contained in tax conventions (if applicable) to solve cases of double residence for determining their residence for tax purposes. An Entity such as a partnership, limited liability partnership or similar legal

arrangement that has no residence for tax purposes shall be treated as resident in the jurisdiction in which its place of effective management is situated. For additional information on tax residence, please talk to your tax adviser or see the OECD automatic exchange of information portal.

The first stage of the investment decision process will involve extensive quantitative screening on the basis of a number of key parameters and proprietary valuation models.

This method will allow the AIF to examine and filter a large number of companies and quickly identify potential investment targets, which will then be thoroughly researched and analysed to determine whether they meet the AIF's value criteria.

Although global economic conditions and the state of financial markets internationally may impact all markets and regions to some extent, some markets react differently to the same set of conditions. The Portfolio Manager will select managers from a large, global universe of funds in order to select the best-of-breed managers across a wide range of strategies and asset classes.
